PROFESSIONAL SUMMARY

Information Systems undergraduate (GPA: **3.72/4.00**) with hands-on experience executing the **end-to-end data analytics process** — from data acquisition and cleaning to **EDA, dashboard development**, and stakeholder presentation. Proficient in **Python, SQL, and Power BI**, with a national capstone project scoring **95/100** for translating survey and sentiment data into actionable business insights. Strengthens technical analysis with proven communication skills gained teaching **115+ students** across two system-analysis courses.

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy, Matplotlib), SQL, JavaScript, TypeScript, HTML/CSS
Data Visualization & BI Tools: Power BI, Microsoft Excel, Google Data Studio
Machine Learning & Statistics: K-Means Clustering, Regression Analysis, EDA, Random Forest (in progress), A/B Testing (in progress)
Business & System Analysis: Requirement Gathering, UML, ERD, Flowchart, UI/UX Prototyping, Figma
Developer Tools & Platforms: Git, GitHub, VS Code, Google Colab, QGIS, Vercel, n8n Workflow Automation
Soft Skills: Data Storytelling, Analytical Thinking, Stakeholder Communication, Cross-functional Collaboration

EDUCATION

Universitas Bakrie Jakarta, Indonesia
Bachelor of Information Systems — Focus: Data Analysis & Business Intelligence *2023 – Present (Expected 2027)*
• **GPA: 3.72 / 4.00** — High Distinction
• Relevant Coursework: Database Management, Statistical Analysis, Data Structures, System Analysis & Design, Operating Systems

PROFESSIONAL EXPERIENCE

PT Vinix Seven Aurum — MSIB Mandiri Batch 4 Yogyakarta, Indonesia (Remote)
Junior Data Analyst *February 2026 – June 2026*
• **Data Cleaning & Validation:** Conducted end-to-end data collection, cleaning, and validation on multi-source datasets, resolving missing values and anomalies to ensure analysis-ready data integrity.
• **Exploratory Data Analysis:** Performed EDA, regression, and clustering analysis in Python and Excel to identify career-readiness patterns among Indonesian university students.
• **Survey & Sentiment Analysis:** Designed and executed a national survey and sentiment analysis, translating unstructured responses into structured, actionable insights for stakeholders.
• **Dashboard Development:** Built interactive dashboards in Power BI and Google Data Studio to visualize findings and support stakeholder decision-making.
• **Capstone Delivery:** Presented final analysis and strategic recommendations to industry mentors, earning a **95/100** evaluation score for the "Proyek Berdampak" capstone project.

Universitas Bakrie Jakarta, Indonesia
Teaching Assistant — Information Systems Analysis & Design *March 2026 – July 2026*
• Delivered instruction to **55+ students** in a single course section, covering UML (Use Case, Activity, Sequence, Class Diagrams), ERD, flowcharting, and UI/UX prototyping in Figma.
• Guided student teams through end-to-end system analysis and design projects, providing consultation and structured feedback on prototypes.
• Authored practicum modules and grading rubrics in collaboration with course lecturers, standardizing evaluation criteria.
• Reviewed and scored assignments for 55+ students, delivering feedback that improved prototype quality across teams.

Universitas Bakrie Jakarta, Indonesia
Teaching Assistant — Operating Systems *September 2025 – December 2025*
• Coordinated and facilitated weekly lab sessions for **60+ students**, covering Memory Management, Process Scheduling, and File Systems.
• Configured and maintained Linux (Debian) and Windows environments on Virtual Machines, achieving **100% lab session continuity** with zero downtime throughout the semester.

- Developed interactive learning modules and practical exam scenarios, strengthening students' hands-on competency in system-level programming.
- Evaluated assignments and final projects, delivering structured technical feedback that accelerated student skill progression.

IEEE Student Branch — Universitas Bakrie

Jakarta, Indonesia

Human Resource & Network Staff

March 2025 – Present

- Managed **end-to-end recruitment** (sourcing, screening, onboarding) for **50+ applicants per cycle**, consistently selecting candidates aligned with organizational values and objectives.
- Designed and executed **upskilling programs** for **30+ members**, incorporating needs assessment and performance evaluation that increased member retention by **65%**.
- Built a structured **HR administration system** to track member KPIs across **6 divisions**, improving cross-divisional reporting efficiency.

FEATURED PROJECTS

- BarangBareng — Peer-to-Peer Rental Platform** | JavaScript, TypeScript, HTML/CSS | Team of 6 2026
- Conducted **market research** and built **sales forecasting** models to validate demand for a P2P rental platform targeting Indonesian Gen Z students; developed front-end features and led end-to-end testing prior to launch.
- WebGIS Disaster Risk Mapping — DIY Yogyakarta** | QGIS, Spatial Data Analysis 2025
- Built a WebGIS model layering hazard and regional indicators to identify **low-disaster-risk zones** across Daerah Istimewa Yogyakarta, supporting regional disaster-mitigation planning.
- Tokopedia Text Mining** | Python, Google Colab, NLP 2025
- Applied **text mining and NLP** techniques to Tokopedia product review data to extract keyword patterns and sentiment signals informing product and customer insights.
- GoFood Marketing Analytics & Strategy** | SQL, Power BI 2025
- Analyzed GoFood marketing campaign performance using **SQL and Power BI**, identifying budget reallocation opportunities to boost campaign conversion rates.
- Global Superstore Executive Dashboard** | Power BI, DAX, Data Modeling 2025
- Engineered a **multi-KPI executive dashboard** in Power BI using advanced DAX modeling, enabling leadership to monitor global retail profitability in real time.
- Customer Segmentation with Python** | Python, Scikit-learn, K-Means | DQLab March 2025
- Built a **K-Means clustering model** that segmented customers into 5 distinct behavioral groups from demographic and transactional data to support targeted marketing.
- Business Decision Research & Predictive Analytics** | Python, SQL | DQLab February 2025
- Developed a **predictive analytics model** achieving **85% decision accuracy**, providing data-backed recommendations that supported resource allocation optimization.

CERTIFICATIONS

- Sertifikat Proyek Berdampak (Score 95/100)** — PT Vinix Seven Aurum 2026
- Data Analytics Job Simulation** — Quantum & Forage March 2026
- Data – AI Agent for Data Analysis** — IBM May 2026
- Big Data Integration and Processing** — UC San Diego, Coursera April 2025
- Data Analyst Bootcamp: Excel, SQL, Python & Power BI** — Karirnex March 2026
- Samsung Innovation Campus (SIC) — AI & Python Programming** — Samsung & Skilvul 2025/2026
- Data Analytics Certified Course** — RevoU January 2025
- Customer Segmentation with Python (Part 1 & 2)** — DQLab Mar–Jun 2025
- Data Analyst Project: Business Decision Research** — DQLab February 2025
- Data Visualization Fundamentals** — Dicoding Indonesia July 2025
